PROFILE

A full-stack developer who designs. I build software end to end: the interface, the APIs and database behind it, and the pipeline that ships it. I graduated from Open Window Institute in 2025 and I'm finishing a PGDip in Interactive Development. Open to developer roles.

WHAT I DO

- **Interfaces**
  Web, mobile and desktop apps in React, React Native and Electron.
- **APIs & data**
  Node.js and .NET services, SQL and NoSQL databases with secure access rules.
- **Pipelines**
  Every change type-checked, linted and built with GitHub Actions before it ships.
- **UX design**
  User research, prototypes and usability tests in Figma before the code.

EXPERIENCE

Freelance Web & App Developer 2024 - 2026

- Built web and desktop apps for clients with React, .NET, Firebase and Electron.
- Launched a production site for a non-profit, including a domain move that kept every printed QR code working.
- Secured client data with Firestore security rules and made sites easy to find with SEO.

Earlier: Technician, Vodacom (2023—2024) • Brand Promoter (2020—2024)

ACHIEVEMENTS

2026
Pendoring Finalist
Built the web app for the Leke Lente Lingo campaign.

2024
Hackathon Winner
Open Window Hackathon, as part of the winning team.

2023
Top 10, Industrial Design
Open Window, for a sculptural wooden chandelier.

EDUCATION

PGDip Creative Practice, Interactive Development
Open Window Institute • 2026

UX Design & Interactive Development
Open Window Institute • 2023—2025

SKILLS

Front end
React · TypeScript · JavaScript · React Native · Tailwind CSS · Electron
