

CURRICULUM VITAE · 2026

Enzo De Vittorio

Full-stack Developer & *UX Designer*

enzo.devittorio5@gmail.com +27 73 662 4471
myportfolio-8c863.web.app github.com/EnzoDV08

SKILLS

Languages
TypeScript, JavaScript, C#, SQL, PHP, HTML, CSS

Front end
React, React Native, Expo, Vite, Astro, Vue, Tailwind CSS, Bootstrap, Electron

Back end & data
Node.js, .NET, Firebase (Auth, Firestore, Storage, Hosting), PostgreSQL, MySQL, MSSQL, MongoDB, Swagger, Zod

AI & APIs
OpenAI API, ElevenLabs, Claude, Hugging Face, EmailJS

Motion & 3D
GSAP, ScrollTrigger, Lenis, Three.js, Canvas API

Workflow
Git, GitHub, GitHub Actions, CI/CD, unit testing

UX & design
Figma, user research, usability testing, prototyping, design systems, service blueprints, Photoshop, InDesign

EDUCATION

PGDip Creative Practice, Interactive Development
Open Window Institute · 2026, in progress

User Experience Design and Interactive Development
Open Window Institute · 2023-2025

RECOGNITION

Pendoring Finalist · 2026
Leke Lente Lingo

Hackathon Winner · 2024
Open Window Hackathon

Top 10 Chandelier · 2023
Open Window Industrial Design

LANGUAGES

Afrikaans (first language), **English**

OFF-SCREEN

Rock climbing, cooking, road trips, cinema, music, gaming

PROFILE

Full-stack developer who designs. I build the whole product: **React and TypeScript** interfaces for web, mobile and desktop, the **Node.js and .NET** services and third-party APIs behind them, **SQL and NoSQL** databases, and the **CI/CD pipelines** that test and ship it. Open Window Institute graduate (Class of 2025), finishing a PGDip in Interactive Development, and co-founder of Stack Studio. I've shipped production sites for real clients and built the web app behind a Pendoring-finalist campaign.

EXPERIENCE

Co-founder & Developer · Stack Studio
2026 - present

- Co-run a two-person studio with Armand Naudé, building brand-led, cinematic websites.
- Designed and built the studio's site in **React, TypeScript, Vite and Tailwind CSS**, with GSAP + Lenis motion and scroll-scrubbed 3D devices in **Three.js**, rendered at build time.
- Built a guided, step-by-step project brief that gives prospective clients an estimate before they book a call.

Freelance Web & App Developer · Self-employed
2024 - 2026

- **MPG Foundation** (mpgf.org.za): developed the production site for a community non-profit in **React, Vite and Firebase**, and migrated its domain with 301 redirects so every printed QR code still resolves.
- Hardened Firestore security rules, built dual-template EmailJS forms (admin notification + auto-reply), and added Open Graph, JSON-LD and Search Console SEO.
- Delivered client web solutions with React, .NET and Firebase, and custom **Electron** desktop apps with **PostgreSQL**, including authentication and secure data storage.

Technician · Vodacom, Irene Mall
Nov 2023 - Jan 2024

Diagnosed and fixed mobile device and network issues; hardware and software support.

Brand Promoter · Various campaigns
2020 - 2024

Represented major brands at live events, working directly with the public.

SELECTED PROJECTS

Honeybee Heroes
Live · Code

React · Vite · Three.js · OpenAI API · ElevenLabs · Firebase

Hive-adoption site for a South African non-profit. Visitors talk to Mellie, a 3D Three.js bee who answers through OpenAI gpt-4o-mini and speaks with ElevenLabs text-to-speech.

Leke Lente Lingo: Lente Book PENDORING FINALIST
Live · Code

React · TypeScript · Vite · Tailwind CSS · Firebase

Team Spring Day campaign where festival crowds invent new Afrikaans words. I built Lente Book, the living-dictionary web app where every word is kept.

Sportify
Code

C# · .NET · PostgreSQL · Swagger · React · TypeScript · Tailwind CSS

Team-built sports events and achievements app: a React and TypeScript front end on a C# / .NET back end with PostgreSQL.

This portfolio
Live

React 19 · React Router 7 · TypeScript (strict) · Tailwind CSS · GSAP · GitHub Actions

Prerendered static site with a **GitHub Actions** pipeline: every change type-checked, linted and built, a preview deploy per pull request, and a live deploy to Firebase Hosting on merge.

More at **myportfolio-8c863.web.app/work**, including **Hushly** (React Native, Expo, OpenAI) and **One River, Two Memories** (Astro, GSAP ScrollTrigger, Canvas API).
